

## Athena Brest

October 1, 2024

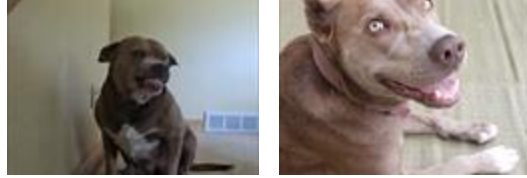

Athena's journey started out as a rough one. As a 1 1/2 year old pup she was found as a stray and wound up on death row at a shelter until Adopt a Pit Rescue found her, which then led her to ur family. She gratefully accepted her new home, and thoroughly enjoyed her new canine companion, Mia, who took her under her paw and showed her the ropes. Athena was immediately bonded to Justin. Which was interesting, because she normally was not fond of men. They went on many hikes together. SHe would showcase her impressive agility, rock climbing and doing stunts that could only be described as doggy par-kor. She was extremely smart, obedient (thanks to her aceing her intensive training) and playful. Her orange ball was her absolute favorite toy and she would play for hours if you let her. She bonded with Theresa, Knowing that's where her spoiling came from- food, snuggles, and hours upon hours of ball playtime. In January 2022, another human family member was added - Joey. Athena knew Joey from the start of pregnancy, and developed a special bond with him because of this. It was like he was her pup, and she tolerated so many of his shenanigans because of their relationship. Athena also enjoyed the company of her other human siblings - Kellan and Abby. The kids babysitter, Renee, was another one of her favorite humans. She would sit with Renee for hours, snuggling and enjoying the endless affection and treats. Athena was tragically taken by a sudden-onset illness over a month and a half's time at only 5 years old. She will forever be loved and remembered, especially full teeth bearing smile, that was her way of saying "I love you" I'm

so happy you're here.
