

Bug Liff

November 21, 2018 - September 11, 2019

Bug is very special to me. She was the smallest out of her litter. I stayed-up through out the day and night, helping her eat and drink. Her head was bigger then her body, I had to hold her backside down while she drank. We formed a tight bond. She slept beside me every night and always greeted me when I got home. I would pick her up, she would kiss me, then lay her head down on my shoulder. She went with me no matter where I went. She liked playing in water, and she liked walking with me when I went hiking or playing disk golf. I could count on her to always be there. She didn't need a leash, she stayed with me. She is greatly missed, But, I know she is still by my side. I love you Bug and I really miss you.
