

## Callisto Wilcox

December 1, 2002 - June 7, 2019

We found Callisto on our vacation in the Smokey Mountains. We were staying in a cabin and heard some rustling in the bushes next to the cabin and thought it was a baby bear! To our surprise it was a beautiful dog! She had a silky coat of many colors and the softest ears we have ever felt! She was sweet and bashful around us but full of life and excitement running around the mountains! We always say she adopted us! She wouldn't leave our cabin! We checked with the rental staff and were told she had probably been dumped there because a lot of unwanted pets are dumped in the mountains. "Please take her and give her a good home," they said. We had no problem doing just that especially when no one claimed her with our posted search for her owners! We loaded her up and headed home at the end of our trip. Arriving home we had her vet checked and microchip checked. We were told she was about 15 months old and in good health. No microchip was detected and she became part of our family! We named her Callisto for the constellation of the bear. She was our little bear cub! She lived a long and happy life with us and we miss her so much! She was special to all who knew her! Rest In Peace dear girl. Love you!

AC

“ *Callisto was loved by her extended family. She always greeted us happily and was such a gentle soul. We will miss her sweet welcome when we visited.*
