

## Cathy Nicholason

October 31, 2025

Cathy comes from a long line of tuxedo cats that we have had in our family since about 1994. We believe Cathy lived for over 12 years. She is survived by her daughter Yuna and 7 grandchildren that are distributed amongst our family. None of them are tuxedo cats. There is a chance that she is survived by a couple of other tuxedo children who were adopted out to non-family. She was a very wise cat with outdoor experience and survived many difficult situations as she was an outdoor/indoor cat for most of her life until this year. When indoors, Cathy loved a lot of attention and wouldn't forget her loved ones even if they were away for an extended amount of time. She lived a great life full of exploration, outside of the walls of the house. She lived fully and she lived freely and we would like to show her a deeper level of respect by going through with this process and preserving her memory.
