

## Chester Shreve

September 10, 2003 - February 22, 2018

My cat Chester was a very special pet to me. He was my "boy" and my "buddy." We went through a lot together, including his coping with LUTD in his early years. We got through all that, and life was good over the next 10 years. He was a big boy and often just enjoyed hanging out with us. We moved to a new home last year, and he adapted really well. Recently, for reasons unknown, he quit eating. We tried everything, including different foods, syringe feeding, and a feeding tube, but God decided that it was his time to leave this earth after 14 years with us. It is a hard thing to deal with now, and there is a certain emptiness in this house. His cremains are in my office now, and I have some wonderful memories that help me with the healing process.
