

Cowboy Hickman

February 2, 2023

Someone left him in a cage by my garage. It was my birthday. I had COVID and didn't know. I knew he had to be sick. He had FIV and IBD. I got him neutered. I thought he could possibly be adopted. He started losing weight after getting stable with his other conditions. He also had diabetes and his outlook wasn't good. After multiple vet visits and talks, I decided to let him die with dignity. Cowboy will be missed. He got to be inside and know love.
