

## Goose Hill

August 22, 2015 - October 14, 2025

Goose lived a very full, very enriched 10 short years. We are so thankful for every moment we had with her. She loved her humans fiercely, but she loved mealtimes, her Kong frisbee, and her Chuck-It ball most. She was a retired sport dog that trained in Search and Rescue (and even flew in a helicopter with her human!), flyball, disc, dock diving, you name it—we tried it. She was fearless, bold, even reckless at times, but she was also an incredibly gentle dog who never met a stranger and was intensely loyal to Her humans. She got us through so many hardships. We will miss her every day for the rest of our lives, and will endure this grief as long as we need to because it means she was here, and that it mattered. The mass in her abdomen that took her from us was the only time she ever needed to go to the vet for being sick. She had so much life left to live. We will continue to do it for her, in her stead. Her legacy she leaves is profound, and one that altered so many lives. Rest easy, our girl—you did your job so well. We will be okay, we just weren't ready for you to leave.
