

Kelp Fletcher

July 19, 2023

I inherited Kelp from an older couple who could no longer care for him. He had belonged to their daughters and had gone with both of them to college. Kelp attended University of Vermont with me and moved to Ohio when I started vet school. Kelp was beloved by all who knew him. He LOVED people and would swim right up to you and splash you. I will never know another turtle with as big of a personality as Kelp. In his 33 years Kelp lived in 5 different states and attended 4 universities. I miss Kelp more than I could ever describe but I know his spirit will live on through all those that loved him.
