

## Madeline Tipton

May 1, 1998 - November 6, 2017

My precious girl Madeline left this world peacefully at home the morning of 11/6/2017. She leaves behind myself and extended family as well as her littermate, Mike, to grieve. She was found along with her two brothers and sister in an air conditioning duct where they were left by their mother, on June 1, 1998. At 4 weeks old, along with the others, had to be bottle fed for a few weeks. Her's was the first face to look up at me when I took the lid off the box they were in. She greeted me with a very loud and demonstrative "MEEEEWWW!! She had me by the heartstrings at that moment. We were together for 19 ½ years.. She was a wonderful and faithful, steadfast gift that God gave me. She particularly enjoyed being brushed and was very demanding about it! Her brother Mike is the lone survivor of that litter. I miss her tremendously, but she can now run and play without having to feel the pain of arthritic legs, or contend with kidney and thyroid disease. The love will continue.

ST

“ *Madeline, with her brother Mike, brought comfort, joy and peace to my sister Anne for over 19 years. She loved being combed especially when a human friend was in the bathroom. With her subtle charms, she stole the heart of our father, a dog man. Maybe he is combing her now for eternity.*
