

Mandy Dennis

November 13, 2019

I inherited Mandy from my grandparents. They didn't have time to devote to her, so, we took her in. She was lovable and friendly. She loved having her belly rubbed and always made me feel better when I was feeling depressed. She lived for a very long time (I had her for 15 years) and she was spoiled from the day she was born to the day she died. I loved her and I will miss her very much.
