

Milo & Molly Gearinger

December 9, 2020

We lost both our beloved dogs, Molly and Milo, on December 9, 2020. Molly was a Golden Retriever we had since she was born over 13 years ago. She was our third Golden and by far the smartest and most personable. As a typical Golden, all she wanted was to be with us and be loved on. She suffered for years from kidney failure and finally came to the end of her struggle.

Milo was a rescue dog we adopted almost three years ago when he was about 10 years old. DNA analysis showed he was part spaniel, chow, and even some Rottweiler among other breeds. All we knew he was the sweetest, most laid-back dog we could have found. While he struggled with his short legs to get up the steps to the second floor, he always wanted to be with us. He loved his sister Molly and all the dog beds we had scattered around the house.

Two months ago, Milo had a seizure and an MRI identified a large brain tumor. He also had a brain bleed during the seizure that impaired his ability to walk, eat, and drink. Prednisone therapy helped some, but he never regained his prior mobility and quality of life.

When Molly's time came, we decided to send the two friends over the rainbow bridge together. There he can bug his sister by walking under her and Molly can swat him with a stuffed toy when she wants him to play. They will be joined by our other Goldens, Shannon and Maggie, so Milo will have plenty of legs to walk under.

They both loved to sit on our back porch to sniff the wind and keep track of the squirrels. This is where their ashes will be placed. One day we will all be together again, but in the meantime, they are sorely missed.
