

Misty Mayberry

February 1, 2006 - July 7, 2020

Misty was a miracle girl. She was my foster in 2006 with one eye removed and the other a cataract since birth. Her cataract surgery was successful but the family adopted her lost her 3 hours after getting her. It took me 6 days to find her and it was a miracle that she had survived that ordeal so I kept her with me the rest of her life. The ordeal cost her the other eye but she knew her house and her step-sisters so she flourished for 8 years as a wonderful part of our family. Her blindness did not stop her from living a wonderful life and she is sorely missed. Her step-sisters were her guide dogs every where in the house and backyard and never left her side. They now sleep on the recliner exactly the way Misty slept and miss her too.
