

Molly Cantley

June 5, 2008 - December 14, 2021

Really hard to put into words just what Molly meant to our family. For almost 14 years Molly was the center of our world. We think back to that day in August 2008 when she took her first car ride home from the breeder's home. She laid right between her 2 new sisters, Jessica and Kaylyn. From that day forward there was a bond that was unmatched between Molly and our family. She loved to celebrate the holidays and especially her birthday each year. She also loved Sunday mornings when we would go as a family to breakfast. She always made it a point to look pretty so she would get a bite of a donut at the drive through window.

She enjoyed walking the loop around the neighborhood. She would get to chase the birds, run through the field, and meet friends along the way. She would lay on the bench in the front office window and wait for her sissies to come home from school and then as they grew up she would wait for them to return from work. She always greeted them at the door with that cute wagging tail and was so excited to spend her time with them. So much so she would always get a case of the zoomies. There was never a doubt just how much she was loved and she made sure to love us back.

We will forever be grateful that Molly blessed our lives as she made us a better family.

The rainbow bridge is where she is now and that thought is what will keep our hearts full.

She will always be our baby girl.
