

## Reese Quick

November 15, 2014 - July 28, 2021

Reese became a part of our family in November of 2014 when we got our first apartment. She became a fun and loving part of our family ever since (even though she didn't enjoy meeting new people.) Her first and favorite toy was a mouse on a stick that she enjoyed jumping and catching until she tore it off as a kitten. After, for 6 years she's carried her "mousie" around the house, especially if she thought we were leaving. It was her comfort toy.

Reese enjoyed the challenging game of "Catch the Laser" she would play for multiple minutes until she got dizzy or we let her catch it. After playtime, or anytime really, she'd always come running for treats when she heard the sound of the bag crinkle together from the pantry. This always led to what we called the "pets." She loved being petted while she ate her treats, but especially at night time in the recliner with her favorite person, dad.

When we brought home a baby human addition to the family after 4 years of her being the only child, she wasn't sure what to think. But she grew to love his excitement and love for her, just like his dad.

Reese passed away unexpectedly at a young age of 6 years old just after our son began to say her name as he petted her. We will all miss her sassy, loving paws around the house but will most definitely never forget her.
