

## Sylvester Lemke

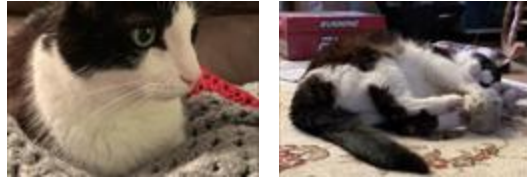

February 27, 2001 - October 23, 2019

Sylvester was truly a cat with 9 lives. He made it through biting 2 live cords and getting a jolt from both, bladder surgery, e-coli, and then living over 6 years with a kidney disease diagnosis. He was also the perfect lap cat. He spent most of his time on our laps. We have 18 years and 8 months worth of the most wonderful memories of him. We'll love and miss him forever.
